

TOTAL EDUCATION SECTOR coverage across the built environment

education design & build magazine 2017

edb is a must read for all stakeholders involved in the design, build and operation of school buildings. We look at the latest policies, funding streams, strategies and management issues and consider how these impact the built environment. With regular comment from architects, contractors, suppliers and analysts, we look at different ways of improving the learning experience – showcasing the best ideas in building design and the most innovative use of materials and technology.

higher education estates magazine 2017

Published in tandem with edb, **hee** explores the latest developments in Higher and Further Education. We look at cutting edge learning environments, the high standards of accommodation, the research labs, enterprise & innovation hubs and spaces shared with high tech companies. We also examine the top quality sports and performance buildings and the social facilities that complete the student experience.

Our features approach

Our comprehensive coverage of internal and external environments provides a valuable insight into both design and specification. Our choice of topical case studies reveals the latest and most innovative design ideas. Product areas range from technologies and materials making up the building envelope to the fullest specification for classrooms and communal areas, including:

Cladding & roofing	Building controls
Glazing & rooflights	Heating, ventilation & AC
Floors, walls & ceilings	Insulation
Acoustic systems	ICT & AV systems
Modular buildings	Sanitaryware
Doors & access systems	Facilities for sport & play
Washrooms & changing areas	Fire safety & security
Classroom & lab furniture	Shelters & canopies
Indoor & outdoor lighting	Paints & finishes

Editor's note: We are always pleased to receive your ideas, article suggestions and high resolution photography on any of the above topics.
